

BeOn for suppliers

IT- & process-qualifications
AUDI AG

Product release in accordance with VDA requirements by the VW Group

Suppliers use the BeOn (Bemusterung [English: sampling] Online) system to provide standardised initial sample test reports and to communicate and coordinate sampling planning with the Group. Recording, editing, and release of initial sample test reports according to VDA requirements for purchased parts and assemblies is carried out using the Group business platform (One.KBP).

Prerequisites

Supplier employees responsible for sampling.
Sampling process knowledge.
A BeOn user account will be provided by the Audi Akademie trainer.

Objectives

After completing the training, the participant will have a basic understanding of sampling planning, in accordance with the provisions of VDA Volume 2 and its implementation in the Volkswagen Group. Furthermore, the participant will become familiar with the BeOn process and gain basic information as to how to ensure optimal usage of the IT system.
In addition, fundamental BeOn user knowledge will be developed and deepened using practical examples and exercises.

Course information

Price	On request
Notes	Training locations: Audi Akademie, Ingolstadt Audi Akademie, Neckarsulm
Duration	1 day (09:00-17:00)
Training languages	German, English
Training organisation	You can find current dates, further information, and a registration template at: Link Audi Akademie website

Contents

- ▶ **BeOn fundamentals:**
Group business platform (ONE-Portal), system requirements and access, pre-series phase milestones based on supplier-relevant product development process milestones, sampling fundamentals, sampling systems according to submission levels, BeOn process flow and status.
- ▶ **Sampling planning and maturity validation:**
What is the link between maturity validation and sampling, how does the maturity validation prepare for sampling?
- ▶ **BeOn ISIR:**
Creation and copying of an initial sample inspection report, recording of relevant report information, first sampling versus resampling, VDA appendices in accordance with the VDA submission levels.
- ▶ **BeOn und IMDS (HP):**
Connection/dependencies between an IMDS entry and sampling to be carried out in BeOn.
- ▶ **BeOn test results and documents :**
Recording test results for individual parts and assemblies and adding accurate, test order-related appendices. Correct input of subcontractor samples throughout the supply chain.
- ▶ **BeOn - Sampling planning :**
Familiarisation with requirements for sampling planning according to VDA requirements and their implementation in the BeOn IT system.

Porsche AG related sampling requirements are covered by this BeOn-training!

Please be informed that Audi Akademie also provides this BeOn-training in a LiveOnline-format using a „virtual“ training room. You stay at your premises, and we will bring the training to you! The training is performed in 3 three-hours sessions. Prerequisites are a LAN/WiFi-connected PC/laptop, headset and microphone, and a free-software downloaded.

LION for suppliers

IT-& process qualifications AUDI AG

Product release in accordance with VDA requirements by the VW Group

Suppliers use the LION (online parts information for suppliers) system to organise and support communication and coordination with the Group. They have the option to share all data relevant to them and to coordinate with the relevant point of contact via the Group business platform (KBP).

Prerequisites

Previous process knowledge of parts check, commitment, part generation levels and Formel Q new parts Integral is desirable.

Objectives

After completing the training, participants will have developed an overall understanding of LION and its modules:

- ▶ TTA Sampling deadlines and contact persons
- ▶ CoRe Commitment Review
- ▶ QPNI Qualification program new parts—integral
- ▶ TGS Part generation level administration

Course information

Price	On request
Notes	Training locations: Audi Akademie, Ingolstadt Audi Akademie, Neckarsulm
Duration	2 days Day1 (09:00-17:00) Day2 (08:00-16:00)
Training languages	German, English
Training organisation	You can find current dates, further information, and a registration template at: Link Audi Akademie website

Contents

- ▶ **LION in general:**
Prerequisites from customer requirements, basic data, tasks workflow, process status, tasks and parts searches, authorisation transfer, print functions
- ▶ **LION TTA:**
VW Group and supplier contacts, recording and release of dates, automatic date acceptance, grouping functions, interdependencies with CoRe.
- ▶ **LION CoRe:**
Task scheduling for priority parts, topic areas, dates, volume preview and costs, traffic light system.
- ▶ **LION QPN-I:**
Maturity verification methods, due dates agreement for the various maturity levels and acceptance of multistage 2-day production, measurement criteria processing in theory and in practice, acceptance of multistage 2-day production
- ▶ **LION TGS:**
Creation and maintenance of part generation levels, delivery, evaluation, grouping function

This training focuses on VDA standard „maturity level assurance“, covered by the LION-module QPN-Integral.

LION Certificates

IT-& process qualifications AUDI AG

Country-related certification management process

The LION system ("Supplier Parts Information Online") is intended to assist suppliers with organisational matters and facilitate communication and coordination with the Group. It enables suppliers to share all relevant data and to coordinate with the respective contacts via the Group Business Platform (One.KBP).

Getting LION Certificates system-access a training participation is mandatory!

Goals

In this training you will gain an insight on the legal requirements of licencing, the workflow, the system LION and the execution of certification tasks together with the constructing engineer of the technical development or the coordinator of certificates of the Quality Assurance.

Course info

Price	Training is free, travelling expenses are not covered
Notes	Training locations: Audi Akademie, Ingolstadt Audi Akademie, Neckarsulm
Duration	1 day (09:00-17:00)
Training language	German, English
Training organisation	You can find current dates, further information, and a registration template at: Link Audi Akademie website

Contents

► Fundamentals:

Background, responsibilities, update certificate, initial certification
Process of execution / Workflow: onboarding of suppliers

► Basics of China Certificates

Requirements of licencing, concerned component groups, different kinds of certificates
Consequences of wrong / missing labelling

► LION system access

Reference person of master data, (role of responsible person)
Task overview, (first certification, updating, status display)

► LION certification tasks

Certification-Tasks identify, edit, save and send
-Input of initial and update certificates
Input of target date shift, no future supply planned
Status value and report of the dates in LION
Identify of concern-edit certificates (accepted/declined)

► Interfaces with other relevant IT systems at Volkswagen Group (KVS, QPNI@LION, BeOn)

KPM-QS for Suppliers

IT-& process qualifications AUDI AG

Content

- ⇒ **KPM-QS basics**
 - ▶ General information about the system
 - ▶ General system functions
 - ▶ The processing procedure
 - ▶ The roles in the system
- ⇒ **Overview of claims in KPM-QS**
 - ▶ The overview
 - ▶ The 2nd tier orders and 2nd tier maintenance tabs in the field
 - ▶ The Inspection Report tab for Halle
- ⇒ **Claims processing**
 - ▶ The supplier orders
 - ▶ Processing with the 8D report in the field and Halle
 - ▶ Documents
 - ▶ Completion
- ⇒ **Research**
 - ▶ Search function for claims and complaints
- ⇒ **Practical examples and exercises**

Prerequisites

Participants need access to One.KBP (www.vwgroupsupply.com) and the company administrator must have enabled access to KPM-QS for the participant's User-ID.

Please take your One.KBP user-ID with you when attending the training!

Objectives

This training gives suppliers insight into the process and features of KPM QS. The overview lists all claims after SoP that have occurred under a supplier number and for which an order is required for the supplier to process the claims via 8D report.

The claims can also be searched.

Course information

Prices	on request
Notes	Location of training: Ingolstadt, Neckarsulm Live Online training on request,
Duration	1 day (09:00-17:00)

Training dates You can find current dates, further information, and a registration template at:
